**Additional Information**

Although the main focus of the work for this project will be the south end of the stadium other areas may include:

- Upgrades to sound and audio/visual technologies in other parts of the stadium as described in the Audio/Visual Program Verification Narrative.
- Underground storm sewer remediation inside and outside the stadium/field.
- Possible natural gas service to the stadium
- Electrical rework required on the west side of the stadium as a result of relocating the infrastructure at concourse zero.
